Connor Duffey

Wallingford, CT, 06492 | (475) 223 9271 | connor_duffey@outlook.com

OBJECTIVE

Computer Science student seeking a Full-Time position to apply classroom knowledge in real-world development environments and contribute meaningfully to team goals upon completion in Decenmber.

EDUCATION

Bachelor of Science in Computer Science | Rochester Institute of Technology – Expected December 2026**.**

SKILLS

Conceptual: Agile, CI/CD Pipeline, Version Control (Git, GitHub), Concurrency, Artificial Intelligence, Searching, Unit Testing, Data Mining

Programming: Python (3+ Years), Java (3+ Years), SQL (2 Years), C (1 Year), C# (1 Year), TypeScript (1 year), MIPS Assembly (1 year)

Frameworks & Tools: Spring Boot, Angular, JavaFX, PySpark, Databricks, Pandas, DockerDesktop

Other: HTML/CSS, REST API, Basic Statistics, MS Office, Atlassian Suite (Jira, Confluence), RSA & AES Encryption

PROJECTS

- C# Peer-to-Peer Messaging System | Academic, Spring 2026
  - Built a TCP server using asynchronous sockets to accept and manage multiple client connections concurrently.
  - Implemented message broadcasting, allowing clients to send messages that are relayed to all connected peers.
  - Added thread-safe locking mechanisms to ensure proper synchronization.
  - Designing peer-to-peer extensions enabling clients to establish direct encrypted communication channels
- Jott Language Interpreter | Academic, Fall 2025
  - Implemented a custom lexer in Java to tokenize a made-up language's syntax.
  - Built a semantic analysis phase to perform type checking, scope resolution, and error reporting.
  - Developed a runtime traverser to execute control flow, function calls, and variable evaluation.
- Ecommerce Application | Academic, Fall 2025
  - Collaborated in Agile sprints to develop a full-stack website.
  - Built RESTful backend with Java Spring and dynamic frontend with Angular.
  - Increased test coverage to 90% using JUnit.
- Movies Mock Database | Academic, Fall 2024
  - Modeled relational schema and built EER diagrams.
  - Developed SQL queries for complex data retrieval and reporting.
  - Simulated user interaction via Java CLI and maintained GitHub version control.
- Java MVC Chess Puzzle Solver | Academic, Spring 2023
  - Implemented a chess puzzle solver in Java using the MVC architecture to separate logic, UI, and control flow.
  - Designed algorithms to evaluate legal moves, detect solved status.
  - Improved maintainability and extensibility through modular class design.

WORK EXPERIENCE

Ahold Delhaize USA January 2025 – June 2025

Data Integration Intern Qunicy, MA

- Debugged Python/SQL scripts in Databricks, reducing data processing time by roughly 20%
- Authored documentation for design specs and data pipelines
- Translated business requirements into technical specs for developers and vice versa

Rochester Institute of Technology | Office of the Registrar October 2023 – Current

Degree Audit Assistant Rochester, NY

- Processed over 1000 student records with 95% accuracy
- Ensured data integrity across degree audits and maintained FERPA compliance

HONORS & CERTIFICATIONS

RIT Presidential Scholarship (2022–Present)
